

The Division of Logistics Services operates the NIH Supply Center and two self-service stores.

NIH Supply Center

Formerly known as Gaither Distribution Center and renamed to the NIH Supply Center, is a 150,000 square foot storage facility that includes chemical, hazardous and temperature-controlled storage space. The Supply Center stocks items not carried in the stores and replenishes the Self Service Stores on a daily basis in support of the NIH community.

Hours of Operation: 8:00 a.m. to 4:30 p.m.
Receiving Time: 7:30 a.m. to 3:30 p.m.
Email: [NIHSC Customer Service](#)
NIHSC Customer Service: 301-496-9120

Self-Service Stores

The self-service stores are conveniently located on-campus. At the stores, employees may purchase office and laboratory supplies for official use. We offer NIH employees walk-in shopping service for emergency or small quantity orders of stock items.

The foremost objective of these stores is to provide quality stock in a fast, efficient and economical manner.

	M-MuLV Reverse Transcriptase (RNase H-), Cat# M0368L		
	Desc: M-MuLV Reverse Transcriptase (RNase H?) is a recombinant M-MuLV reverse transcriptase with reduced RNase H activity and increased thermostability. It can be used to synthesize first strand cDNA at higher temperatures than the wild type M-MuLV. The enzyme is active up to 50°C, providing higher of cDNA and more full length cDNA product up to 12 kb. specificity, higher yield

NI-NTA SPIN KIT AND COLUMNS PROVIDE NI-NTA SILICA IN A CONVENIENT MICROSPIN FORMAT FOR EASY PREPARATION OF MULTIPLE SAMPLES IN PARALLEL. EACH SPIN COLUMN CAN PURIFY UP TO 150UG OF 6XHis-TAGGED PROTEIN FROM CELLULAR LYSATES IN JUST 5 MINUTES. NI-NTA SPIN COLUMNS ALLOW PROCESSING OF UP TO 24 SAMPLES IN AS LITTLE AS 30 MINUTES. THEY PROVIDE A SIMPLE METHOD FOR FUNCTIONAL SCREENING OF ENGINEERED PROTEINS SELECTION OF CLONES EXPRESSING FULL-LENGTH TRANSLATION PRODUCTS AND COMPARISON OF EXPRESSION LEVELS LIKE ALL NI-NTA MATRICES, NI-NTA SPIN COLUMNS CAN BE USED FOR ONE-STEP PROTEIN PURIFICATION UNDER NATIVE OR DENATURING CONDITION. OneTaq? Quick-Load? 2X Master Mix with Standard Buffer is an optimized, ready-to-use blend of Taq and Deep VentR ? DNA Polymerases ideally suited to routine PCR applications from templates, including pure DNA solutions, bacterial colonies and cDNA products. The 3'?5' exonuclease activity of Deep Vent DNA Polymerase increases the fidelity and robust amplification of Taq DNA Polymerase (1). The convenient quick-load master mix formulation contains dNTPs, MgCl2, buffer components and stabilizers as well as two commonly used tracking yes for DNA gels. On a 1% agarose gel in 1X TBE, Xylene Cyanol FF migrates at ~4 kb and Tartrazine migrates at ~10 bp. Both dyes are present in concentrations that do not mask comigrating DNA bands. Item Description: Phire Animal Tissue Direct PCR kit is for amplification of DNA directly from a wide variety of animal tissues including mice, fish, birds, and insects. No DNA isolation is required prior to PCR. Kit based on Phire Hot Start II DNA Polymerase making it extremely robust and tolerant of many PCR inhibitors present in unpurified animal tissues. Kit also includes control primers that can be used with numerous animal species.

6550-00-L12-1408	Glutamine XL 200mM, Cat# 118-288-061	BOTTLE	17
	Glutamine XL 200mM, Cat# 118-288-061		
	Description: Greatly improved stability over the L-glutamine supplement. L-glutamine is an essential amino acid and a key component of culture media, serving as a major energy source for propagating cells. It is very stable as a dry powder and as frozen solution but degrades rapidly in liquid media or stock solutions, producing toxin compounds. Optimal cell performance usually requires supplementation of the media with L-glutamine prior to use. L-alanyl-L-glutamine is a stabilized dipeptide form of L-glutamine which does not degrade in liquid media during storage or incubation, providing superior results in several application. This product contains dipeptide L-alanyl-L-glutamine at 43.44 mg/mL, in 0.85% NaCl.

Embl Tec RunOne Electrophoresis System 110V with Time Control, Cat # EP-2115

Desc: This is the RunOne Electrophoresis System 110V with Time Control: Includes RunOne horizontal electrophoresis tank&lid,and RunOne power supply (25V, 50V, 75V, 100V) with timer. Again, the advantage of having this one over the EP-2000 is the time control feature. Just set the time you need to run the gel and do something else. When the gel is ready, the timer goes off and the current is shut off so there is no worry that you might over-run your gel. Additionally, the timer will start counting upwards so if you know exactly how long you have been gone. The current US list price for this is \$425.00 and the NIH 25% discount price is \$318.75.

GENESCREEN PLUS HYBRIDIZATION TRANSFER MEMBRANE, Best choice for radiometric techniques. Highest sensitivity for radiometric detection in nucleic acid hybridization. High affinity doe RNA: 500% greater retention than nitrocellulose Binds DNA of all sizes, from oligonucleotides to fragments >23kb. Positive charge creates a very strong bond: no need to fix nucleic acids to the membrane. High bond strength increases the number of reprobes possible. Bond strength and uniform pore size (0.45uM) also improves resolution by minimizing diffusion during transfer.

Multi-Channel Pipetman Neo, 8-Channel 2-20ul, Cat# 37-201P20

Unit issue: each / Packaged: 1 per box / Stored at room temp / Shelf life: n/a

Item Description: 2-20ul Multi-Channel Pipettor. The Pipetman Neo Multichannel is a fully adjustable air-displacement pipette and is the newest member to the renowned Gilson Pipetman family. Delivering unrivaled performance, precision, and durability, the Pipetman Neo Multichannel is the ideal choice when working with microplates. The unique design applies equal pressure from either side of the pipette instead of on the center of the channels like other multichannels to ensure extremely high accuracy and consistency. Universal tip compatibility is another benefit of the Pipetman Neo and functions to fit the major leading tip brands. Along with unmatched performance and versatility, the Pipetman Neo is designed with lightweight materials and contains newly engineered springs that reduce pipetting forces up to 50%. The patented Gilson ejector system makes tip disposal virtually effortless to further enhance comfort. The complete lower part of the pipette is autoclavable to prevent contamination.

Pipetman M P200M, 20-200ul, Cat# 37-700P200, Unit issue: each / Packaged: 1 per box / Stored at room temp / Shelf life: n/a Item Description: 20-200ul, PIPETMAN M is a new motorized LIGHT WEIGHT member of the PIPETMAN family from Gilson. PIPETMAN M is a fusion between the renowned accuracy, precision and robustness of the PIPETMAN P and user-friendly functions that will simplify your work day. Pipetman M requires virtually zero pipetting forces to prevent repetitive strain injuries. This ergonomic pipette also features a motorized piston to eliminate pipetting variability among users, adjustable piston speed and four pipetting modes (repetitive, mix, reverse and pipetting). PIPETMAN M is so easy to use that you will have the feeling that you are using a PIPETMAN P. You won't change the way you pipette! THE LIGHTEST MOTORIZED PIPETTOR ON THE MARKET. 6640-01-461-8409	OPTIPLATE-96 BLACK, BLACK OPAQUE 96-WELL MICROPLATE, EACH CATALOG # 6005270		58
------------------	--	--	----

OPTIPLATE-96 BLACK, BLACK OPAQUE 96-WELL MICROPLATE.

The black OptiPlate-96 F is manufactured from high-quality, black plastic resin, which reduces auto-flourescence and results in low background signals. The plate is ideal for TR-FRET (LANCE) assays. The black microplate can also be used for high-signal luminescent assays to reduce unwanted crosstalk. The pinch bar design of the OptiPlate-96 F facilitates automated processing by robotized systems and the ribbed underside improves trouble-free stacker operation. PerkinElmer microplates are produced under clean room conditions to reduce dust or other contaminants. Bar coded black microplates are also available.

Features and benefits: excellent counting characteristics in flourescence assays, low autofluorescence, ribbed underside to avoid stacker jams, footprint conforms to proposed industry standard (SBS), pinch bar design for optimal robotic processing.

Typical applications: Homogeneous Time-Resolved Flourescence (HTRF), other TRF assay types, Flourescent ELISA, High-signal luminescent assays.

Tissue Culture Treated, Clear Bottom ViewPlate is for cell-based flourescence or luminescence assays where microscopic visualization or bottom-reading is required.

Better microplated deliver better performance. That's why PerkinElmer's microplates are clean room manufactured in Class 100,000 facilities to meet stringent scientific and quality standards. All our microplates are manufactured using the highest quality plastics and substrates and perform particularly well in PerkinElmer-supported applications. They deliver important benefits such as low background, optimum light transmissison and little or not crosstalk. And, in addition to the microplates themselves, we also provide custom coating, barcoding and other specialized services to meet your needs.

6640-01-461-8412	NEW WESTERN LIGHTNING PLUS-ECL, ENHANCED CHEMILUMINESCENCE SUBSTRATE (130ML - 2X65ML), CATALOG # NEL103	EACH	221
------------------	---	------	-----

The Western Lightning Chemiluminescence Reagent Plus is a non-radioactive light-emitting system designed to detect proteins immobilized on a membrane. The method provides a sensitivity of 1-10pg if protein and yields fast, permanent, hardcopy results on Kodak X-Omat Blue Autoradiography Film or on the Geliance Imaging Systems Membranes can be stripped and reprobed if stored wet between uses.

Our Western Lightning Chemiluminescence Reagent Plus is an enhanced luminol-based substrate for HRP-catalyzed detection.

Economical choice that provides twice the sensitivity of standard reagents, and up to 8 times the sensitivity of some brands.

Best signal-to-noise ratio - provides excellent results using either PVDF or nitrocellulose membranes.

Performance guaranteed for 12 months from ship date, with unopened reagents stable for 8-weeks at room temperature, making this product ideal for storerooms. Even if you do not require increased sensitivity, you can benefit from Western Lightning Chemiluminescence Reagent Plus. Maintain the same level of sensitivity, but reduce film exposure times or decrease concentrations of primary antibodies, thus reducing costs.

------------------	--	------	-----

THE WESTERN LIGHTNING CHEMILUMINESCENCE REAGENT PLUS IS A NON-RADIOACTIVE LIGHT-EMITTING SYSTEM DESIGNED TO DETECT PROTEINS IMMOBILIZED ON A MEMBRANE. THE METHOD PROVIDES A SENSITIVITY OF 1-10pg OF PROTEIN AND YIELDS FAST, PERMANENT, HARDCOPY RESULTS ON KODAK X-OMAT BLUE AUTORADIOGRAPHY FILM OR ON THE GELIANCE IMAGING SYSTEMS MEMBRANES CAN BE STRIPPED AND REPROBED IS STORED WET BETWEEN USES.

OUR WESTERN LIGHTNING CHEMILUMINESCENCE REAGENT PLUS IS AN ENHANCED LUMINOL-BASED SUBSTRATE FOR HRP-CATALYZED DETECTION.

ECONOMICAL CHOICE THAT PROVIDES TWICE THE SENSITIVITY OF STANDARD REAGENTS, AND UP TO 8 TIMES THE SENSITIVITY OF SOME BRANDS. BEST SIGNAL-TO-NOISE RATIO - PROVIDES EXCELLENT RESULTS USING EITHER PVDF OR NITROCELLULOSE MEMBRANCE. PERFORMANCE GUARANTEED FOR 12 MONTHS FROM SHIP DATE, WITH UNOPENED REAGENT STABLE FOR 8-WEEK AT ROOM TEMPERATURE, MAKING THIS PRODUCT IDEAL FOR STOREROOMS. EVEN IF YOU DO NOT REQUIRE INCREASED SENSITIVITY, YOU CAN BENEFIT FROM WESTERN LIGHTNING CHEMILUMINESCENCE REAGENT PLUS. MAINTAIN THE SAME LEVEL OF SENSITIVITY, BUT REDUCE FILM EXPOSURE TIME OR DECREASE CONCENTRATIONS OF PRIMARY ANTIBODIES, THUS REDUCING COSTS.

Desc: TruCool? cryogenic tubes feature a thermally fused gasket in the cap, which replaces the traditional O-ring and ensures a tight seal. The internal- or external-thread tubes and screw caps provide a 100% leak-proof seal. This proprietary cap molding process eliminates the risk of O-ring slipping or contamination. Each tube also features a unique barcode identifier (Code 128, up to 10 characters) providing safe and error-free tube identification and eliminating the need for adhesive labels or pen markings. TruCool cryogenic tubes are manufactured in a Class 7 (Class 10,000) clean room in accordance with FDA, GMP and ISO quality guidelines (ISO 13485:2004, ISO 14644 and ISO 14698). Tubes are manufactured from medical grade polypropylene (PP) and caps are made from medical grade polyethylene (PE) with a co-molded thermo-plastic elastomer (TPE) layer. Independently certified sterile by an outside laboratory to be free of human DNA, DNase, RNase, Pyrogen and ATP.

6640-00-L01-2177 MY Fuge Mini Centrifuge Blue Lid, Catalog # 31-500B EACH 190.5

Item Description: The new MyFUGE Mini centrifuge is a personal centrifuge that virtually fits in the palm of your hand. Ideal for quick spin downs of microtubes and PCR tubes, the MyFUGE is extremely easy to use. Simply close the lid and the rotor instantly reaches 6,000 rpm. Open the lid, and the rotor quickly decelerates to a stop for removing samples. An increased capacity eight position microtube rotor is included and comes installed. A second rotor for sixteen 0.2ml PCR tubes and or two 0.2ml PCR strips is also included and stored with the rotor removal key in a convenient compartment on the bottom of the centrifuge. Blue Lid.

Unit of issue: each / Stored at room temp

Manufacture: BenchMark

Manufacture Part Number: C1008-B

6640-00-L01-2179	MyFuge 12, Mini Centrifuge, Cat# 31-501	EACH	272.6
SSS Item: MyFuge 12, Mini Centrifuge; Genesee Catalog # 31-501			
Unit issue: each / Stored at room temp.			
Item Description: Mini Centrifuge with COMBI Rotor. Unlike traditional mini centrifuges, the new MyFuge 12 eliminates the need to change rotors when switching between microtubes and PCR strips. The unique COMBI-Rotor is all that is required for running 12 microtubes and 4 PCR strips simultaneously. With a fixed speed that produces 2,000 x g (5500rpm), this centrifuge is perfect for quick spin downs.			
At just 5.5 inches wide, the MyFuge 12 truly is a personal centrifuge with unmatched capacity and flexibility.
